Workit × BluLever

Partnership proposal — a verified route from training to paid, tracked work

Prepared for Adam Collier, Co-CEO, BluLever Education · 8 October 2026

BluLever makes skilled, self-leading artisans. Workit is where they find paying work, build a verified reputation, and run as micro-businesses.

THE FIT

You own training. We own trust, demand and the work record. Your ecosystem has a gap exactly where Workit lives — what happens after and around training, when a graduate or artisan-SME needs real local jobs and proof of good work. Workit is the 'earn + self-lead' layer of the connected artisan ecosystem you're building.

WHERE WE CAN WORK TOGETHER

1. **"BluLever-verified" badge on Workit**
   A co-branded trust mark on worker profiles. Solves our hardest problem (proving skill, not claiming it) and gives your graduates a visible edge in the trades customers most want vetted — plumbing, electrical, solar.
2. **The earning channel for your graduates & 150+ artisan-SMEs**
   A ready pipeline of local paying jobs — the entrepreneurial outcome your programme trains toward. Your self-leading artisans get demand; we get high-quality, motivated supply.
3. **Verified outcome data back to BluLever**
   Proof-of-work photos, two-way ratings and completed-job history — the graduate-earning evidence your impact funders, corporate B-BBEE sponsors and SETA reporting need (and that your ISAs depend on).
4. **Two-way crew pipeline**
   Your 100+ employer partners use Workit to find vetted crew for overflow and short jobs; our employers get BluLever-grade artisans.

WHY IT STRENGTHENS BLULEVER'S MODEL

→ Your ISAs only repay when graduates earn — Workit is a channel that helps them earn.

→ Impact funders & B-BBEE/SETA sponsors need outcome proof — Workit generates verified earning + work-history data.

→ So Workit makes your outcomes real and measurable. We strengthen your funding model — not ask to be your revenue.

THE ASK — A SMALL, CONCRETE PILOT

Onboard a cohort of BluLever graduates / self-leading artisans onto Workit with a "BluLever-verified" tag, in Gauteng, for 8–12 weeks. Measure how many get paying work and ratings. Low commitment, high signal — it de-risks the full badge and data integrations.
